
The smart carpooling service for companies, communities and organizers

FINALIST

German
Sustainability Award
Design 2022

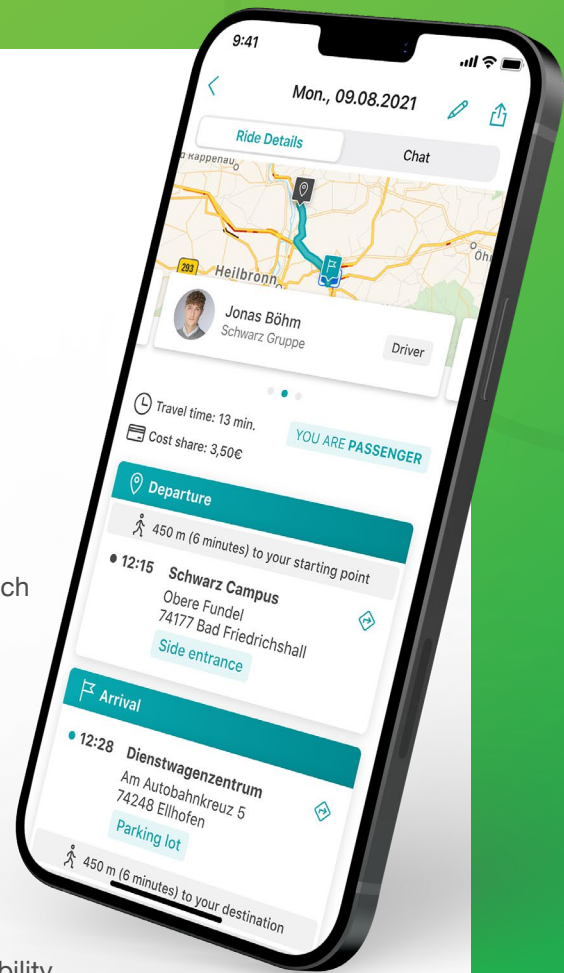

What is twogo?

Whether traveling to work, the city or an event: twogo arranges carpools automatically, efficiently and precisely.

A mobility platform with the latest technology that combines sustainability with economy. twogo offers a wide range of **intelligent additional features**, which are specially designed to meet the needs of companies, communities and cities as well as event organizers.

This includes **comprehensive advice** on the introduction of twogo and the conception of creative and **individual marketing campaigns**.

The twogo ridesharing service provides modern mobility in everyday life and supports the achievement of climate goals.

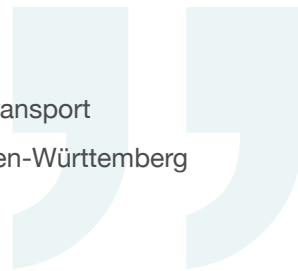

“twogo is a smart way to commute
to work and home with colleagues.

Ridesharing reduces the number of solo trips
and thus reduces environmental pollution.

Such apps are a good contribution to
a new, sustainable mobility.”

Winfried Hermann
MdL, Minister for Transport
of the State of Baden-Württemberg

*By the way: The printed brochure is also sustainable – the paper is made of 100 % recycled paper.

What are the added values of carpooling?

Added value for companies

- Reduce on-site traffic volume
- Stress-free commutes for employees
- Actively participate in climate protection
- Promote sustainable development of the company
- Alleviate parking shortages on company premises
- Increase corporate social responsibility
- Strengthen corporate culture and improve employee networking

Added value for communities

- Reduce traffic in the community
- Relieve congestion in commercial areas and provide better connections
- Contribute to greater sustainability
- Strengthen regional networking
- Increase quality of life and sense of community

Added value for organizers

- Reduce traffic volume at the event location
- Enable a stress-free search for parking spaces
- Contribute to more climate protection
- Sets an example for more sustainable mobility
- Connect participants with each other even before the event

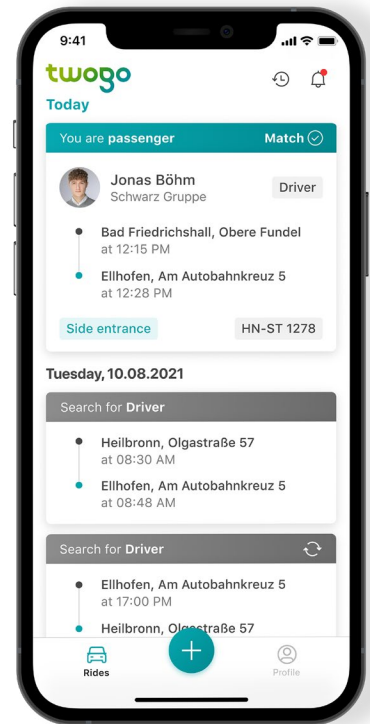

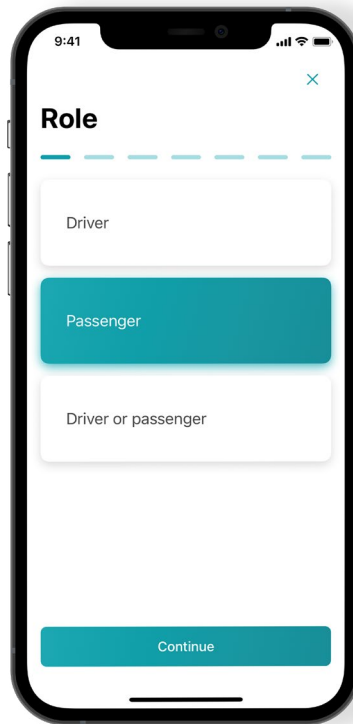

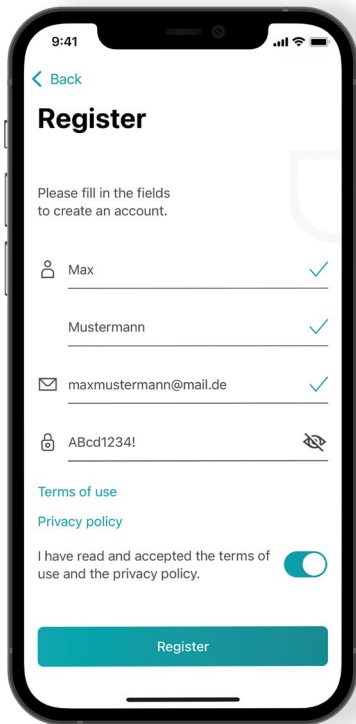

How does twogo work?

Shared rides for commuting to work, within the city, or to events:

The twogo app was developed specifically for the needs of commuters and business travelers.

You enter your ride request and the specially developed twogo algorithm does the rest.

1

Create account

Download the free twogo app or register with your e-mail address at www.twogo.com – in just a few clicks you will find your next carpool.

2

Enter trip request

You want to ride along or drive yourself? Enter your desired role, starting point, destination and time of day and twogo will find the right ride for you.

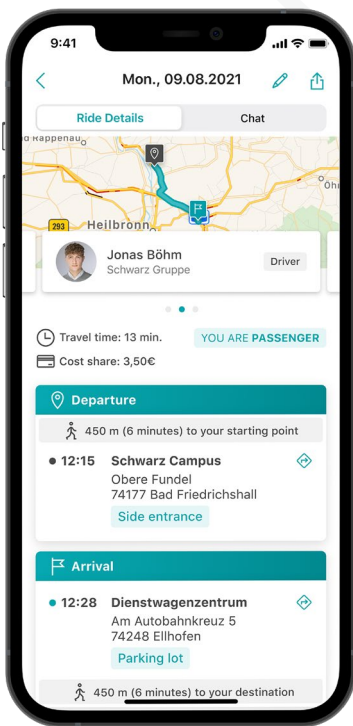

3

Find carpool

Sit back and relax – twogo will find the perfect carpool for you. By automatically comparing similar routes, you are guaranteed to arrive at your destination with ease.

Matching takes just a few seconds – and a suitable ride is offered immediately.

Automatic notifications from the app, as well as all relevant info about the upcoming trip, also ensure a smooth process.

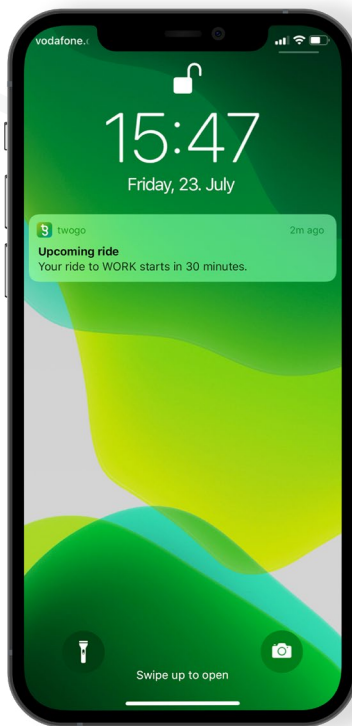

4

Take a ride

twogo not only searches for the perfect carpool, it also arranges them.

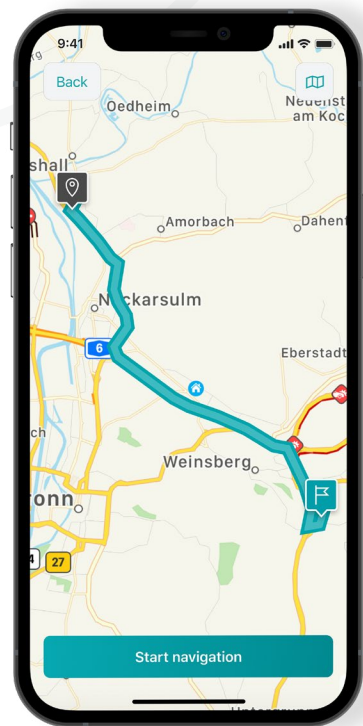

Up to five minutes before the desired start time, you will be automatically informed about a “match” via SMS, e-mail or app.

5

Stay up to date

Should there be any changes, you will automatically receive a notification via app or e-mail. twogo will also inform you where to meet and remind you 30 minutes before departure. This way, drivers and passengers always stay up to date.

6

Get in and go

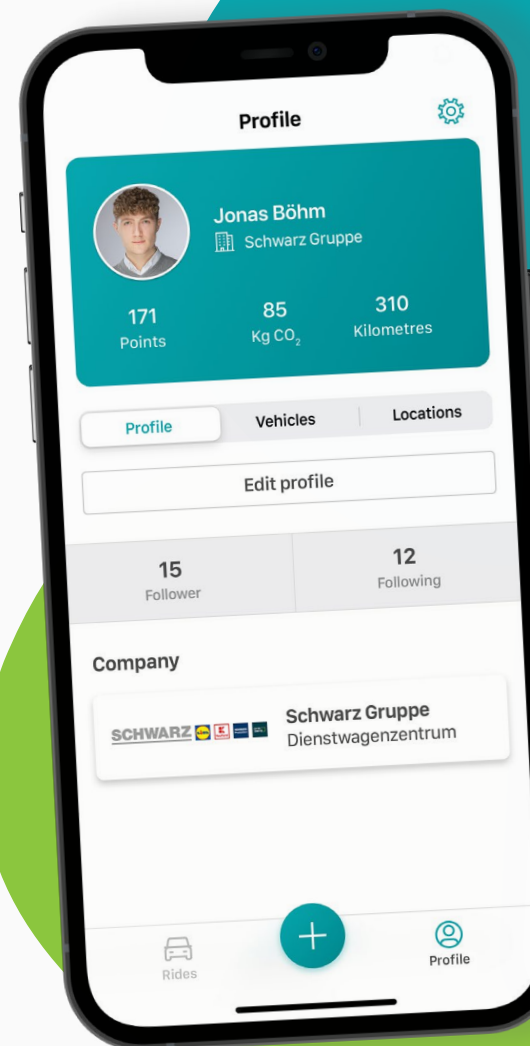

Once the match has been successfully completed, you are ready to start your journey together.

The route is conveniently displayed in the navigation app.

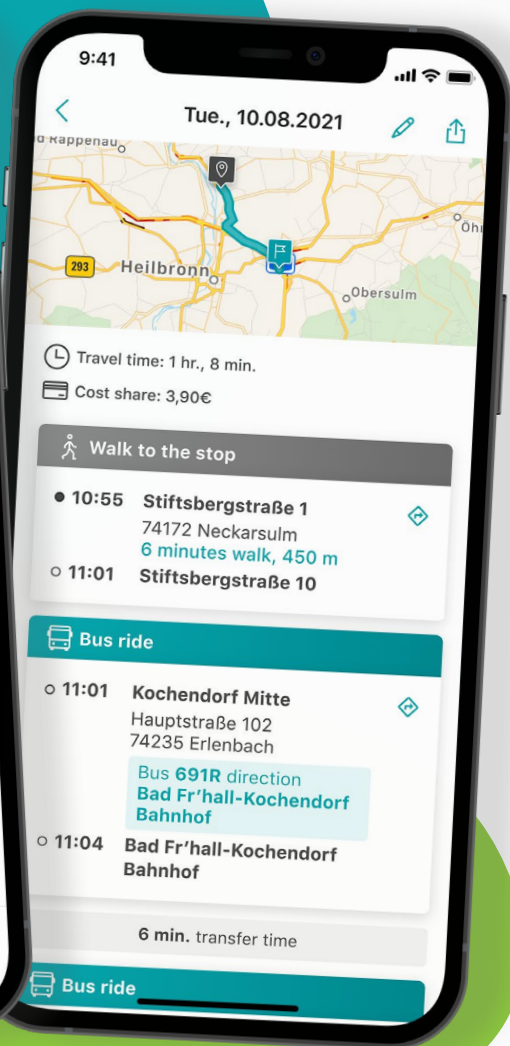

What additional features does twogo offer?

twogo not only finds the perfect ride, but also offers a variety of smart additional features: individual and tailored specifically to you.

- Integration of **carpool vehicles** and **shuttle buses**
- Expansion of the **matchmaking network** with neighboring companies
- Matchmaking for **business trips**
- Use of an **incentive system** for users (e.g. collecting points)
- Preparation of **sustainability reports** (e.g. CO₂ savings)
- **Prioritized parking** for carpools

Decide for yourself which clever additional functions should be provided for your account. You can also flexibly add individual functions at a later date.

- In-app messages
- Customized corporate design of the apps
- Messages between **driver** and **passengers** in **twogo chat**
- Route planning based on historical traffic data
- Details of **alternative public transport services**
- **Follower** and **sharing feature**
- **Navigation** via your favorite **map app**

What makes twogo stand out?

- ✓ **Experienced B2B ridesharing company** with strong customer base
- ✓ **Years of expertise** in corporate mobility management
- ✓ **Renowned brand** of the Schwarz Group
- ✓ Use via **mobile app, website** and **e-mail function**
- ✓ Available in over **25 languages**
- ✓ **Customized marketing portfolio**
- ✓ Highest level of **data protection**
- ✓ **State-of-the-art technology** and **user-friendly design**
- ✓ Continuous **development** and **maintenance**
- ✓ **24/7 service** and **support**
- ✓ **Personal consultation** with a **project manager**

Curious?

Let us advise you personally and without obligation.

We will show you exactly how the twogo mobility platform works – and will make sure you receive the perfect solution for your needs.

Visit www.twogo.com to find a selection of questions and answers providing additional information for end users and administrators.

Here the features of the twogo ride-sharing solution are also explained.

Our Mission

We are convinced:

Sustainability and emissions savings will become increasingly important in politics and society.

Innovative mobility solutions play a key role here. With twogo, we are optimizing corporate mobility and supporting the achievement of climate and mobility goals.

Our Vision

We are rethinking mobility and want to anchor carpooling as an integral part of commuter and everyday mobility.

**More carpooling
and fewer
cars on the road!**
